"All Roads Lead To Brumley South"

Volume 4  
March 2009

## Positive News In A Bad Economy

It seems like today's news only conveys the negative effects caused by the economy : businesses forced to close their doors, long time employees losing valuable jobs and rising costs in every area of business. Brumley South has been very fortunate, however, to have avoided most of these negative effects and that is all thanks to our faithful customers. Through it all, Brumley South continues to advance. A perfect example is our newly expanded Nanometrics Support & Repair department. We understand the hardships the economy is putting on current and new businesses in the high-tech industry. This is why we are offering services such as our rental and lease program as well as a monthly "**Economy Booster.**" We are currently working with several "start up" companies to help overcome their financial challenges. Brumley South is also helping many companies by purchasing or trading equipment to ensure that our customers have all the materials needed to maintain a healthy business. Brumley South offers an expedited "hot swap" program for down tools.

Brumley South is a perfect example that by providing for and understanding your customers needs, you can survive this rough economy. It is our mission and goal to provide our customers with outstanding service and continue to value our customer relationships. We appreciate our customers and it is because of you that we move forward in the economic fight. "**How Can We Help You?**"

If money is tight, here are some of the alternative payment plans we accept...Credit Cards & PayPal.

## March Employee Highlight...

Mary Pat Broderick has served as Metrology Manager for the last 8 years with Brumley South. Mary Pat has helped to develop new product lines and has expanded our sales and service areas. Her main contribution is her outstanding customer service as well as the management for our Dryden, Profilers and newly added Nanometrics lines. Mary Pat has over 30 years' experience in the electrical industry. Her previous employers include ADE (Formerly known as ESTEK) and General Electric. Mary Pat has two daughters and loves to garden. She is also well known for providing a loving home for stray dogs and cats. Everyone at Brumley South appreciates her upbeat personality and willingness to lend a helping hand.

Brumley South Celebrations...Happy Anniversary to Cheryl Gregory (3 Years) & Mary Pat Broderick (8 Years)
